ENGINEERING & CONSTRUCTION

from Feasibility....to Start up.

 **TEKNOPRO**

QUALITY IS RESPECT FOR CUSTOMER TRUST

 **TEKNOPRO**

From Türkiye to the World...

www.tekno.pro.com.tr

TEKNOPRO A.Ş. provides services in chemistry, pharmaceutical, paper and biotechnology industrial facilities investments, from feasibility to start-up stage, with its experienced staff, computer-aided design and project group, well-equipped workshops, and wide construction site facilities from 2000.

Fluid mechanics, fluid transfer, heat transfer, crystallization, evaporation, distillation, extraction, absorption systems, tube, and plate heat exchangers, chemical process special equipment, designs, manufacturing, and on-site assembly are among our service areas.

OUR VISSION

We are working to become one of the engineering and manufacturing companies that provide services for industrial facilities worldwide.

OUR MISSION

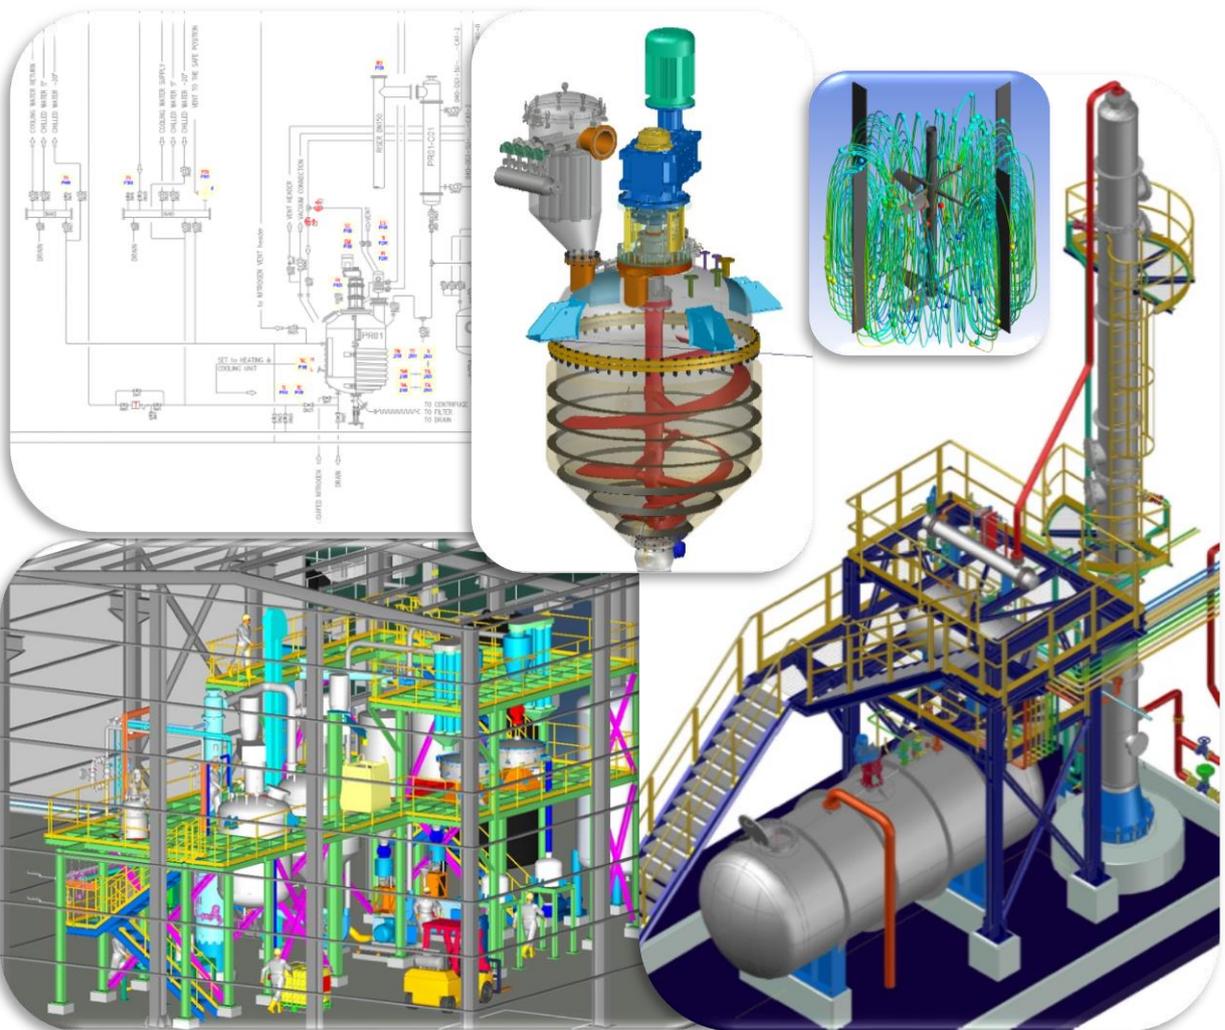

Considering the satisfaction of our employees and customers, necessary for industrial facilities in Türkiye and abroad; The first priority in its activities is to provide engineering, process and equipment design, manufacturing and assembly services, with occupational safety, high quality products and on-time delivery.

OUR VALUES

Trust and Transparency,
Flexibility,
Responsibility,
Sustainability,

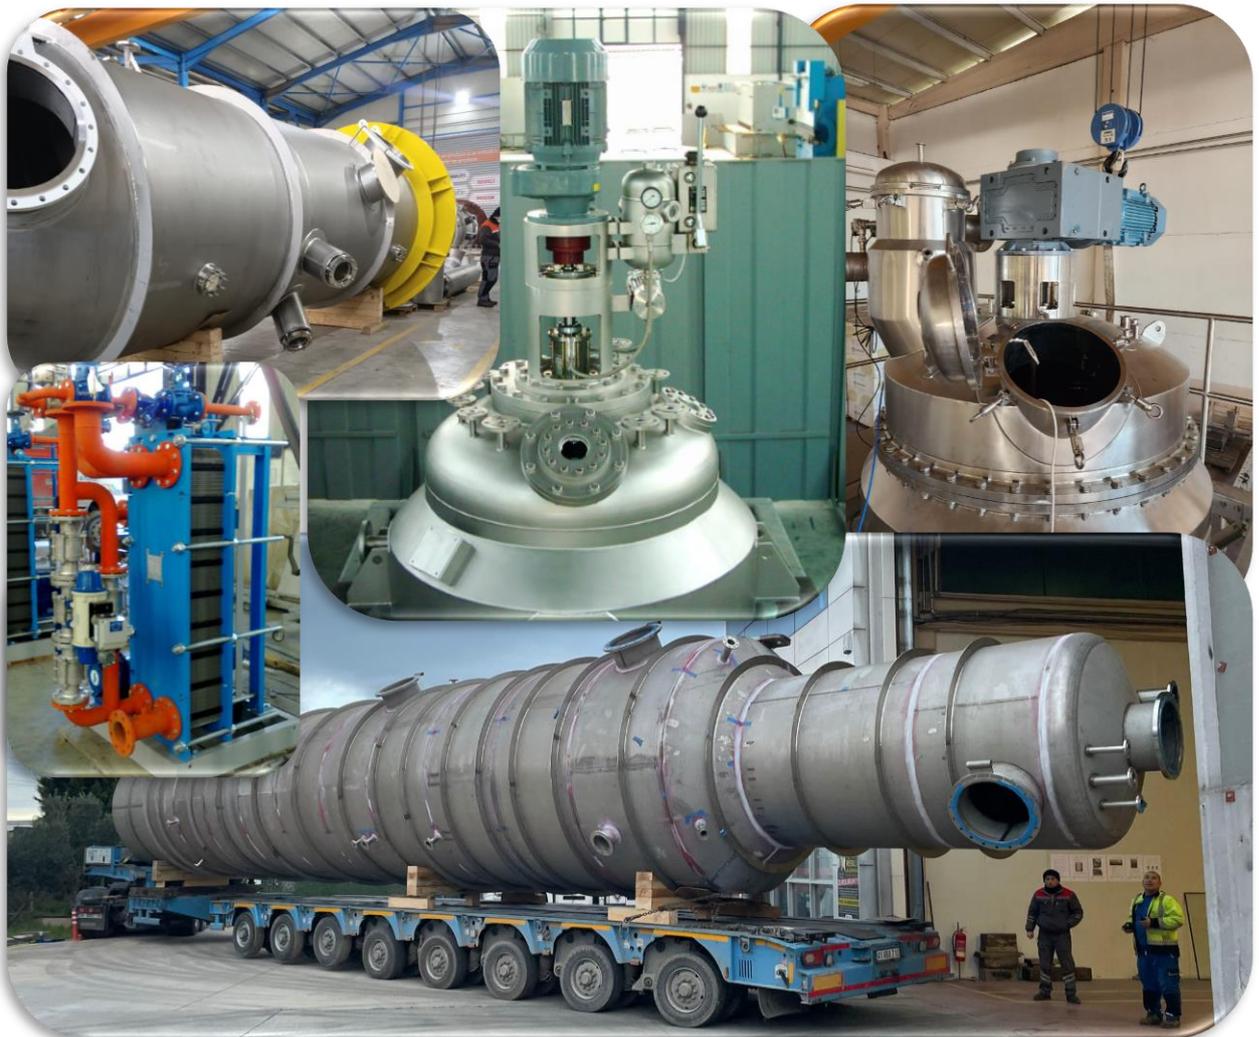

ENGINEERING

Teknopro A.Ş. provides services in chemistry, pharmaceutical, paper and biotechnology industrial facilities investments, from feasibility to start-up stage, with its experienced staff, computer-aided design and project group, well-equipped workshop, and wide construction site facilities.

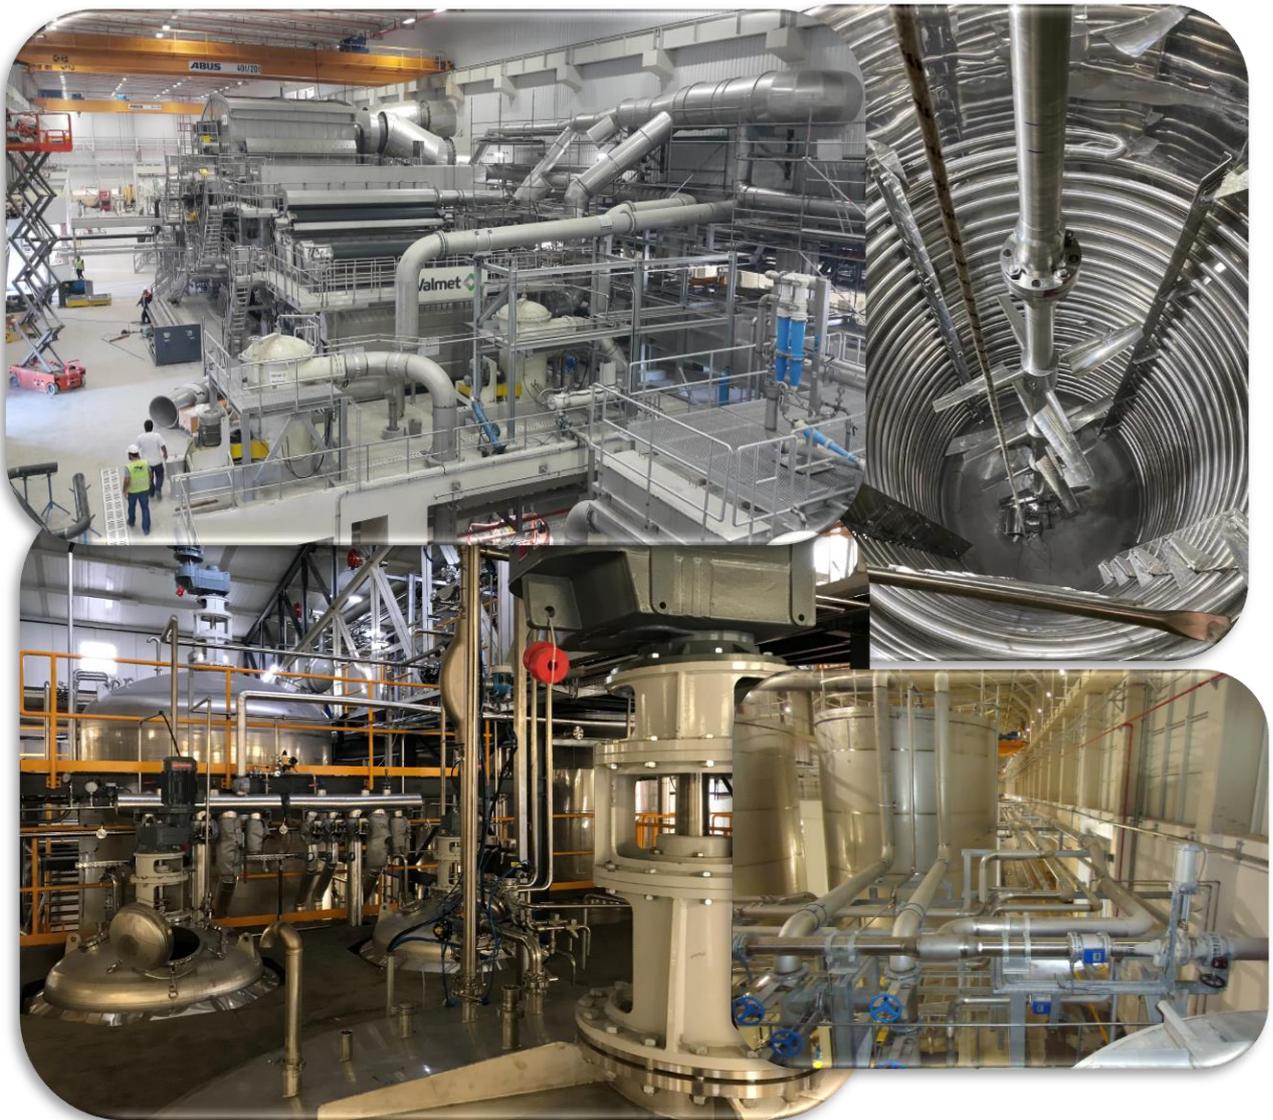

MANUFACTURING

Providing engineering, manufacturing, and assembly services at international standards, TEKNOPRO offers chemical process reactors, mixers, shell & tube, and plate heat exchangers, storage tanks, pressure tanks, heating, and cooling systems, filters and dryers, crystallization & evaporation systems, distillation, extraction, absorption systems, provides a wide range of services to its customers with underground and aboveground piping and equipment, steel construction manufacturing and assembly, and production of special process equipment in line with customer requests.

CONSTRUCTION

TEKNOPRO A.Ş has the capacity and infrastructure to take responsibility for the management of all activities in the process from feasibility to start-up in investments in chemicals, pharmaceuticals and paper industrial facilities.

START-UP

TEKNOPRO A.Ş. is able to serve its customers in the processes covering all systems and components within the facility in industrial facility installations, facility design, R&D, installation, testing phase, commissioning, and maintenance processes based on the operational requirements of the end-user.
