## *our company*

SCENTFUME is a scent marketing company which specialized in olfactory brand marketing and improving the indoor air environment. Our main business scope is aroma diffusers manufacturing and fragrances selling.

As a pioneer and innovators in the industry, we have been working on the development of aroma diffusers and scents for years. Our aim is to create a completely different olfactory experience and fuse the environment naturally by bringing the original appearance of natural air to you.

We try to find an optimal balance between the customer experience, product performance and olfactory art, to make the scent become a way of life so that the air changes from this moment.

## *our technology*

Scenting systems are produced in accordance with nano-diffusion technology. The cutting-edge technology "Nano Diffusion" enables to release particles smaller than one micron and spread them into the environment effectively. The scent released into the environment in the form of smoke spreads with the airflow. A homogeneous and effective fragrance is provided.

## *patents and certifications*

All Scentfume products passed the CE certification. All our fragrances are produced at high-quality standards and in accordance with international IFRA norms and safety standards.

## *our message*

Scenting with decorative products suitable for architectural design ...  
We dress the spaces with scents ...

## *our mission*

... Is to develop professional, decorative, innovative scent systems. To design the corporate identity of companies with signature scents.

## *our vision*

Scentfume is to be the most reliable company that offers the most innovative, high-quality products and services in the market.
